Re: Status of Application
Greenhouse Gas PSD Permit
Jacksonville Lime Facility

Dear Mr. Caggiano:

By letter dated February 17, 2014 to EPA Region 4 Jacksonville Lime LLC withdrew Greenhouse Gases (GHGs) air permit application and requested that EPA transfer all permit application files to the Department of Environmental Protection (Department). EPA transferred their files via web postings between February 26 and March 6.

On March 18 you submitted an application to the Department for a Prevention of Significant Deterioration (PSD) permit for GHGs. On April 8, we discussed the application with your staff and process experts to understand the basis for the requested GHG emission limits. This letter is to advise you that we are treating your application as a “pre-application” until we receive EPA final approval of the State Implementation Plan (SIP) that contains the Department’s rule changes to accommodate GHG PSD review. We will then log the application as received and advise you, accordingly.

We became very familiar with the project based on our review and issuance of a PSD permit for pollutants other than GHGs. We have also familiarized ourselves with the materials provided by EPA as well as the information provided in the application you submitted and calculations provided for our meeting today. We will continue to work with you, your staff and consultants to ensure that we have all information to conclude the application is complete by the time our SIP is approved so that we can issue a preliminary decision at an early date.

If you have any questions please contact me at 850-717-9076 or David Read at 850-717-9075.

Sincerely,

A.A. Linero, P.E.
