RE: Perdido Landfill, WACS ID No. 1688
Title V Air Construction Permit, Phase I Landfill Gas Collection and Control System (GCCS) Expansion
Air Permit No: 0330246-005-AC
Request for Extension

Dear Mr. Koerner:

This purpose of this letter is to request an extension to the referenced air permit. The construction permit which expires August 2, 2015 consists of the expansion to the GCCS including blowers and flares capable of handling up to 4,400 scfm of gas (2 sets at 2,200 scfm each). At initial construction in 2010, one blower and flare set was constructed with the 2nd set anticipated within 5 years based on projected landfill gas flow rates. At this time, actual flowrates remain below 2,200 scfm. Therefore we would like to respectfully request a 5 year extension to the construction permit which would enable us to install the 2nd blower and flare set closer to when the excess capacity is needed.

Please call me at 850-937-2179 if you have any questions or comments on this request.

Sincerely,

A handwritten signature in blue ink that reads "Brent Schneider".

Brent Schneider, PE
Engineering and Environmental Quality Manager
