SUBJECT: Molten Sulfur Storage &
Handling
Permit No. AC29-167204

Dear Mr. Baig:

Per your telephone conversation with Jim Martin, we offer the following suggested throughput rate limitation on the sulfur system:

"The average daily input shall not exceed 2550 tons per day or 930,750 tons per year. The maximum daily input shall not exceed 2800 tons on any day and for not more than 10 days during the year at this higher rate.

The annual visible emission evaluation shall be performed as near to the 2800 T/D input rate as practicable".

If you have any additional questions please call Jim Martin at 813-782-1591.

Sincerely,

Thomas A. Edwards for JEP
J.E. Parsons,
General Manager
