Subj: Statement for removal of Brinks fan at B Sulfuric  
EUID 003

Dear Mr. Arif,

As per your request in response to our request for a determination that a permit is not required to remove the Brinks fan, please find attached an original Florida PE certified statement (with raised seal) that, due to the installation of a new main blower, the Brinks fan is not necessary, and that removal of the Brinks fan will not increase emissions.

Please feel free to contact me at (813) 364-5753 if you have any questions.

Sincerely,

Ronald L. Brunk  
Superintendent, Environmental Affairs

BUREAU OF AIR REGULATION

Mr. Ron Brunk  
CF Industries, Inc.  
10608 Paul Buchman Hwy  
Plant City, FL 33565

Dear Ron:

CF Industries in Plant City, Florida, operates B Plant Sulfuric Acid Plant with a Brinks fan between the Ammonia Scrubber and Brinks Mist Eliminator Vessel. The purpose of the fan is to boost the flow of process gas through the Brinks Mist Eliminators and out the stack. CF has installed a new main air blower and the Brinks fan is not needed.

The purpose of this letter is to report that the removal of the Brinks fan will not result in additional acid mist, SO<sub>2</sub>, or NO<sub>x</sub> emissions.

Ron, should you have any questions, or if I can be of any assistance, please do not hesitate to call me.

Sincerely,

John R. Horne  
Sales Director  
(314) 275-5812
