Received Messina's submittal yesterday. Contrary to the impression I got at first, the project is considered a modification (scenario 2), so it looks as if they will be subject to PSD on the basis of actual vs. allowable emissions. This application is similar to IMC's PSD-FL-201 issued in 1993. IMC was subject to PSD with a 109,500 tons/year P205 increase vs. CF's 200,000.
