Re: Intent package for Permit No.: 0570040-012-AC  
Tampa Electric Company (TECO)  
F. J. Gannon Station

**Permit Clock:** Today is ARMS Day 81  
**Day 90:** June 19, 2001

The requested modification is to allow TECO the flexibility to burn Wood Derived Fuel (WDF)/coal blends in Units 1, 2, and 4 in accordance with the same conditions specified by Permit No. 0570040-011-AC. The maximum WDF allowed to be burned at the station does not change. When firing WDF, emissions of SO<sub>2</sub> and NO<sub>x</sub> decrease.

Additional information was requested and a satisfactory response received March 21, 2001.

I recommend that this Intent to Issue be sent out as attached.
