BUREAU OF AIR REGULATION

RE: Request for Extension; Ambient Air Monitoring Stations

Project Number: Permit No. 0570057-020-AC/PSD-FL-404

File No: 0570057-020-AC/PSD-FL-404A

Dear Mr. Linero:

The purpose of this correspondence is to request an extension of the 120 day suspense date listed in Section 3. F. Facility Grounds and Roadways- AMBIENT MONITORING AND MODELING REQUIRED. Title V Permit No.0570057-020-AC was dated September 22, 2009. Accordingly, two (2) ambient monitoring stations for Lead-Total Suspended Particles (Pb-TSP) are to be installed and operated at offsite locations to be determined by the Department within 120 days of final issuance of the permit.

EFT has been working closely with the Environmental Protection Commission Hillsborough County (EPC) to implement the installation of the ambient monitoring stations. During a meeting between EPC and EFT on December 9, 2009, EPC utilized discretionary enforcement to interpret the terms of the permit and assumed the responsibility of installing, maintaining, developing the associated standard operating procedures, and operating the monitors. The coordination of these efforts continues. The monitors were purchased by EFT and were delivered to EPC (Tom Tamanini) on December 22, 2009. However, the following essential items have not been confirmed: Approval to install the offsite monitors in the nearby trailer park and local elementary school; the installation of power to the monitor locations once established; and the development of a logistics contract between EFT and EPC for the monitor, sample collection, normal data base management, lab services, and maintenance. In view of the multitude of time consuming efforts anticipated to achieve these objectives, EFT requests a **90 day extension or an extension until installed.**

EFT and EPC have been having weekly meetings coordinating these efforts and EPC is in agreement with this request. Please feel free to call me at 813-744-5004 with any questions or comments you may have regarding this request.

Sincerely,
EnviroFocus Technologies, LLC
