Re: Indiantown Cogeneration

Mike,

Confirming my voice mail, Indiantown Cogeneration has decided not to pursue the Megawatt Increase PSD permit modification. Success of that project was predicated on establishing a favorable contract to sell the additional power; Indiantown has concluded that such a contract cannot be established.

We appreciate the effort that you and the Department have put into the review of the project, and we regret that the project will not be going forward. We request that the application be withdrawn.

I am sending a copy of this email to Cleve Holladay. Please pass along our appreciation of the efforts of everyone involved. I will also be informing Dee Morse and John Notar of the National Park Service that the project will not be going forward.

Please call me at 978-371-4339 with any questions or comments, or if you need a more official notice to withdraw the application. You may also reach Indiantown's Environmental Manager, Nicholas Laryea, at 561-597-6500 extension 19, and PG&E National Energy Group's environmental contact, Robert DeHart, at 301-280-6747.

Thanks again,

AJ Jablonowski
