SITING COORDINATION

RE: Floridan aquifer observation well, Stanton Energy Center, # PA81-14

Dear Mr. Mancini:

The District received your letter dated April 22, 1999, regarding extending the range on the scale of the water level measuring device in the referenced well. I spoke with Buck Oven in F.D.E.P.'s Siting Office about your proposed solution. We both agree that this should maintain your ability to measure the decreasing water levels in the aquifer. Please ensure the measuring device remains referenced to N.G.V.D. or other datum that is being used.

If you have any questions, please give me a call at (904).448.7918.

Sincerely,

Jay C. Lawrence, P.G.

Mr. Jan Lawrence St. Johns River Water Management District 7775 Baymeadows Way Jacksonville, FL 32256

Re: Orlando Utilities Commission Floridan Aquifer Observation Well -

Modification of Means of Measurement

Dear Mr. Lawrence:

Pursuant to our conversation regarding the subject and pursuant to our Power Plant Siting Act permit, No. PA 81-14, please be advised that the current apparent lowered level of the Floridan Aquifer in the vicinity of our facility has caused us to modify our means of measuring the status of the depth of the aquifer, i.e., by use of a numbered level indicator in association with the observation well.

The modification that we have undertaken in order to be able to continually measure the Floridan Aquifer level, is to extend the range of the scale of numbers on the measuring device. Upon such time as aquifer levels return to normal, we shall return the scale to its former range.

Please call me at 407/236-9634 should you have any questions or require any further information regarding this matter.

Sincerely.

Leonard S. Mancini

SITING COORDINATION

Bob:

The Orlando Utilities Commission (OUC) has no objection to the culvert installation as proposed by Polk County provided the following conditions are observed:

- the culverts must be installed such that the road is safe to travel by OUC line maintenance vehicles with a 65,000 pound gross vehicle weight,
- the culverts are placed no closer than 50 feet from any transmission line structure,
- Polk County is responsible for all necessary permitting associated with the project, and
 - the contractor performing the culvert installations attends an orientation class conducted by OUC prior to starting construction on any OUC right-of-way.

(phone number: 423-9100 x-4016) can provide you with Jim Jones scheduling details for the orientation class. questions, do not hesitate to contact me at (407) 423-9171.

Subject:

OUC/Stanton Plant/Modification to Existing Certification/Orange Co

Buck:

I just want to let you know that in any modification for OUC Stanton Plant that we must still have the requirement that they will be responsible for opacity and any excess emissions. We do NOT want this to be removed from the certification. At the present time we have enforcement on going with these folks and would not like to see something in their certification modification to prevent the Dept. from being able to conduct compliance if it is not in their certification. If you have any questions please contact me. Thanks. Len
