PUBLIC NOTICE OF INTENT TO ISSUE AIR PERMIT

Florida Department of Environmental Protection Division of Air Resource Management, Office of Permitting and Compliance Air Construction Permit No. 0950137-041-AC Orlando Utilities Commission (OUC) Stanton Energy Center Orange County, Florida

Applicant: The applicant for this project is Orlando Utilities Commission. The applicant's responsible official and mailing address are: Mr. Jan C. Asbury, Vice President, Power Resources, Orlando Utilities Commission, Stanton Energy Center, Reliable Plaza at 100 West Anderson Street, P.O. Box 3193, Orlando, Florida 32802.

Facility location: The applicant operates the existing Stanton Energy Center, which is located at 5100 South Alafaya Trail, Orlando, in Orange County, Florida.

Project: The applicant applied on March 25, 2013, to the Department for an air construction permit. This air construction permit authorizes the replacement of high pressure and intermediate pressure (HP/IP) portions of the Stanton Energy Center Unit 2 steam turbine with improved blade technology. This facility is classified as a major source of air pollution and as such would be subject to a determination of significant deterioration (PSD) preconstruction review for any pollutant increase at or above the significant emissions rate. A review of the projected emissions for this project shows that none of the emissions from the turbine blade replacement project exceeds the significant emissions rate. Further, such emissions increases due to the project are expected to be zero. Therefore, the proposed project is not subject to PSD preconstruction review and is considered a minor modification to a major facility.

This facility consists of two fossil fuel fired, steam electric generating stations, Emission Units 001 and 002. In addition, there are Emission Units 025 and 026 (Stanton Unit A) that are nominal 170 MW General Electric "F" Class (PG7241-FA) combustion turbine-electric generators, fired with pipeline natural gas or diesel fuel oil. Also, there is an auxiliary boiler, and storage and handling facilities for solid fuels, fly ash, limestone, gypsum, slag, and bottom ash.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.) and Chapters 62-4, 62-210 and 62-212, of the Florida Administrative Code (F.A.C.). The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The Permitting Authority responsible for making a permit determination for this project is the Office of Permitting and Compliance in the Department of Environmental Protection's Division of Air Resource Management. The Permitting Authority's physical address is: Road, MS #5505, Tallahassee, Florida 32399-2400. The Permitting Authority's phone number is 850-717-9000.

Project File: A complete project file is available for public inspection during the normal business hours of 8:00 a.m. to 5:00 p.m. Monday through Friday (except legal holidays), at the address indicated above for the Permitting Authority. The complete project file includes the draft air construction permit, the Technical Evaluation and Preliminary Determination document, the application, and the information submitted by the applicant, exclusive of confidential records under Section 403.111, F.S. Interested persons may view the draft permit by visiting the following website: <http://www.dep.state.fl.us/air/emission/apps/default.asp> and entering the permit number shown above. Interested persons may contact the Permitting Authority's project review engineer for additional information at the address or phone number listed above.

Notice of Intent to Issue Air Permit: The Permitting Authority gives notice of its intent to issue a draft air construction permit to the applicant for the project described above. The applicant has provided reasonable assurance that operation of proposed equipment will not adversely impact air quality and that the project will comply with all applicable provisions of Chapters 62-4, 62-204, 62-210, 62-212, 62-296 and 62-297, F.A.C. The Permitting Authority will issue a final permit in accordance with the conditions of the draft air construction permit unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, F.S. or unless public comment received in accordance with this notice results in a different decision or a significant change of terms or conditions.

Comments: The Permitting Authority will accept written comments concerning the proposed draft air construction permit for a period of 14 days from the date of publication of the Public Notice. Written comments must be received by the Permitting Authority by close of business (5:00 p.m.) on or before

address and telephone number of petitioner; the name address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial rights will be affected by the agency's determination. (c) A statement of when and how the petitioner received notice of the agency action or proposed decision. (d) A statement of all disputed issues of material fact. If there are none, the petitioner must so indicate. (e) A concise statement of the ultimate facts alleged, including specific facts the petitioner contends warrant reversal or modification of the agency's proposed action or statement of the specific rules or regulations the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and, (g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the agency to take with respect to the agency's proposed action. A petition that does not dispute the material facts upon which the Permitting Authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final process is designed to formulate final agency action, the Permitting Authority means that the final action may be different from the final action taken by it in this Public Notice of Intent to Issue Air Permit. Petitioners whose substantial interests will be affected by any such final decision of the Permitting Authority on the
