Joe,

Please review and let's discuss.

Lynn, log this as a project and watch for any hard copies so we don't have duplicate projects.

Thanks!

Jeff

Subject: SWA Biosolids Pelletization Facility - Train #1 & #2 Pug Mill & Recycle Bin Dust Collector

Attached please find a request to install a permanent water spray at the pug mill and a dust collection line for each of the process trains at the Biosolids Pelletization Facility located in West Palm Beach, FL. Both of these projects will reduce fugitive dust from accumulating in the process trains and facility which will greatly reduce the risk of future explosions.

If you have any questions or need additional information, please do not hesitate to contact me.

Sincerely,

Mary Beth Morrison
