**RE: Florida's Regional Haze State Implementation Plan
Lakeland Electric – C.D. McIntosh, Jr. Power Plant (ID No. 1050004)
NO_x Emissions Limit for Unit 1**

Dear Mr. Linero,

In reference to the letter sent by Mr. Brian Accardo of Florida Department of Environmental Protection to Ms. Carol Kemker of United States Environmental Protection Agency, dated July 30, 2013 (enclosed), Lakeland Electric would like to propose that the nitrogen oxides (NO_x) limit for Unit 1 (Emissions Unit 001) at Lakeland Electric's C.D. McIntosh Jr. Power Plant be established at 0.46 lb/MMBtu of heat input, based on a 30-operating day rolling average. This number is based on Unit 1's historical NO_x monitor data, which was previously submitted to you by e-mail on February 12, 2014. Lakeland Electric also proposes that this limit apply to all permitted fuels for Unit 1 (natural gas, No. 6 fuel oil, used oil)

If you have any questions regarding this submittal, please contact me at (863) 834-6684 or ron.kremann@lakelandelectric.com, or Nedin Bahtic at (863) 834-8180 or nedin.bahtic@lakelandelectric.com.

Sincerely,

Ronald Kremann
Plant Manager
