**Re: Tampa Electric Company
Polk Power Station Unit 5
Commercial Operations Re-Notification (PPS5)
Project No. 1050233-018-AC, PSD-FL-363**

Dear Ms. Danois and Ms. Vielhauer:

Tampa Electric Company (TEC) is re-submitting to the Environmental Protection Agency (EPA) and Florida Department of Environmental Protection (FDEP) a corrected date of initial commercial operation as required by 40 CFR 75.61(a)(2)(ii), "The date the unit commences commercial operation or becomes affected, or the date when a new stack or flue gas desulfurization system exhausts emissions to the atmosphere." TEC hereby gives re-notification of commercial operation, for environmental purposes, of PPS Unit 5 will be on March 29, 2007. PPS Unit 5 is a General Electric PG7241(FA) simple cycle natural gas turbine generator with a nominal output of 165 megawatt (MW) and a 114 foot stack.

As the schedule changes TEC will keep the EPA and FDEP updated. TEC appreciates your cooperation in this matter and if you have any questions, please call me at (813) 228-4433.

Sincerely,

Joshua D. Ellwein
Air Programs Engineer

Polk Power Station Unit 4 and Unit 5
Commercial Operations Notification (PPS4) and Commercial Operations Re-Notification (PPS5)
Project No. 1050233-018-AC, PSD-FL-363**

Dear Ms. Danois and Ms. Vielhauer:

Tampa Electric Company (TEC) is submitting to the Environmental Protection Agency (EPA) and Florida Department of Environmental Protection (FDEP) a corrected date of initial commercial operation as required by 40 CFR 75.61(a)(2)(ii), "The date the unit commences commercial operation or becomes affected, or the date when a new stack or flue gas desulfurization system exhausts emissions to the atmosphere." TEC hereby gives notice of commercial operation, for environmental purposes, of Polk Power Station Unit 4 on February 23, 2007, and was synchronized to the grid on February 26, 2007. PPS Unit 4 is a General Electric PG7241(FA) simple cycle natural gas turbine generator with a nominal output of 165 megawatt (MW) and a 114 foot stack. Additionally, TEC hereby gives re-notification of commercial operation, for environmental purposes, of PPS Unit 5 will be on or about March 28, 2007. PPS Unit 5 is a General Electric PG7241(FA) simple cycle natural gas turbine generator with a nominal output of 165 megawatt (MW) and a 114 foot stack.

As the schedule changes TEC will keep the EPA and FDEP updated. TEC appreciates your cooperation in this matter and if you have any questions, please call me at (813) 228-4433.

Re: Tampa Electric Company
Polk Power Station Unit 4
Notification of Actual Startup Date
Project No. 1050233-018-AC, PSD-FL-363

Dear Mr. Sheplak:

Tampa Electric Company (TEC) is submitting a correction to an earlier notification to the Environmental Protection Agency (EPA) and Florida Department of Environmental Protection (FDEP) of the actual date of initial startup as required by 40 CFR Part 60.7(a)(3), which states that a notification of the actual date of initial start-up of an affected facility shall be furnished within 15 days after such date. TEC hereby gives notice that the actual startup of Polk Power Station (PPS) Unit 4 was February 23, 2007 and was synchronized to the grid on February 26, 2007. PPS Unit 4 is a General Electric PG7241(FA) simple cycle natural gas turbine generator with a nominal output of 165 megawatt (MW) and a 114 foot stack.

Re: **Tampa Electric Company
Polk Power Station Unit 4 and Unit 5
Re-Notification of Anticipated Startup Date, Performance and CEMS Certification Testing
Project No. 1050233-018-AC, PSD-FL-363**

Dear Mr. Sheplak:

On December 15, 2006, Tampa Electric Company (TEC) re-notified the Environmental Florida Department of Environmental Protection (FDEP) of the anticipated date of initial startup as required by 40 CFR 52.129(c)(7)(i). PPS Unit 4 is a General Electric PG7241(FA) simple cycle natural gas turbine generator with a nominal output of 165 megawatt (MW) and a 114 foot stack. TEC hereby gives a re-notification notice that the anticipated startup of Polk Power Station (PPS) Unit 4 is January 23, 2007.

On November 1, 2006, TEC submitted the Monitoring Plan and Test Protocol for PPS Unit 4 and Unit 5, which included the initial anticipated performance and CEM certification testing dates. TEC is required by 40 CFR Part 60.8 and 40 CFR Part 75.61 respectively to perform and notify of performance and CEM certification testing. TEC hereby gives a re-notification notice that the anticipated performance and CEM certification testing will be conducted during the week of January 22 and/or January 29, 2007 for PPS Unit 4. Additionally, TEC hereby gives a re-notification notice that the anticipated performance and CEM certification testing will be conducted the week of February 26 and/or March 12, 2007 for PPS Unit 5.

**Re: Tampa Electric Company
Polk Power Station Unit 5
Re-Notification of Anticipated Startup Date
Project No. 1050233-018-AC, PSD-FL-363**

Dear Mr. Sheplak:

Tampa Electric Company (TEC) is re-notifying the Environmental Florida Department of Environmental Protection (FDEP) of the anticipated date of initial startup as required by 40 CFR 52.129(c)(7)(i), which states that the anticipated date of initial startup of source must be done not more than 60 days or less than 30 days prior to initial startup. TEC hereby gives notice that the anticipated startup of Polk Power Station (PPS) Unit 5 may start on February 28, 2007. PPS Unit 5 is a General Electric PG7241(FA) simple cycle natural gas turbine generator with a nominal output of 165 megawatt (MW) and a 114 foot stack.

As the schedule changes TEC will keep the FDEP updated. TEC appreciates your cooperation in this matter and if you have any questions, please call me at (813) 228-4433.

Sincerely,

Joshua Ellwein
