Re: Combustion Turbines C and D Construction Permit No. AC05-193720

Dear Mr. Fancy:

This letter is to request a clarification or modification, if necessary, of construction permit No. AC05-193720 for Combustion Turbines C and D located at Orlando Utilities Commission's (OUC) Indian River Plant.

In view of the Department's latest guidance memorandum concerning ISO correction applicability to combustion turbines, we are requesting approval from the Department to clarify that this requirement only applies when compared with the NSPS standard of 75 ppm, and therefore, is not applicable to PSD compliance testing.

In addition, the construction permit specifies that EPA Method 3 is to be used for determination of O_2 . In view of the lengthy timeframe required to use this method while testing the combustion turbines, we are requesting that we be allowed the use of Method 3A for compliance demonstration as required by Method 20.

Very truly yours,

Gregory A. DeMuth, Director
Environmental Division
