Lawton Chiles, Governor

Carol M. Browner, Secretary

January 4, 1993

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. G. A. DeMuth, Director, Environmental Division
500 South Orange Avenue
P. O. Box 3193
Orlando, Florida 32802

Dear Mr. DeMuth:

The Department received your request for an extension of the construction permit referenced below. The permit is amended as shown.

Permit No. AC05-193720, PSD-FL-173

Current Expiration Date: December 31, 1992

New Expiration Date: June 30, 1993

A person whose substantial interests are affected by the Department's proposed permitting decision may petition for an administrative proceeding (hearing) in accordance with Section 120.57, Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 2600 Blair Stone Road, Tallahassee, Florida 32399-2400. Petitions filed by the permit applicant and the parties listed below must be filed within 14 days of receipt of this intent. Petitions filed by other persons must be filed within 14 days of publication of the public notice or within 14 days of their receipt of this intent, whichever first occurs. Petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. Failure to file a petition within this time period shall constitute a waiver of any right such person may have to request an administrative determination (hearing) under Section 120.57, Florida Statutes.

The Petition shall contain the following information:

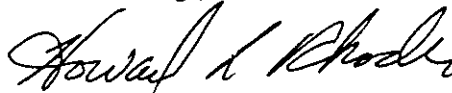

- (a) The name, address, and telephone number of each petitioner, the applicant's name and address, the Department Permit File Number and the county in which the project is proposed;

- (b) A statement of how and when each petitioner received notice of the Department's action or proposed action;
- (c) A statement of how each petitioner's substantial interests are affected by the Department's action or proposed action;
- (d) A statement of the material facts disputed by Petitioner, if any;
- (e) A statement of facts which petitioner contends warrant reversal or modification of the Department's action or proposed action;
- (f) A statement of which rules or statutes petitioner contends require reversal or modification of the Department's action or proposed action; and
- (g) A statement of the relief sought by petitioner, stating precisely the action wants the Department to take with respect to the Department's action or proposed action.

If a petition is filed, the administrative hearing process is designed to formulate agency action. Accordingly, the Department's action may be different from the position taken by it in this intent. Persons whose substantial interests will be affected by any decision of the Department with regard to the application have the right to petition to become a party to the proceeding. The petition must conform to the requirements specified above and be filed (received) within 14 days of receipt of this intent in the Office of General Counsel at the above address of the Department. Failure to petition within the allowed time frame constitutes a waiver of any right such person has to request a hearing under Section 120.57, F.S., and to participate as a party to this proceeding. Any subsequent intervention will only be at the approval of the presiding officer upon motion filed pursuant to Rule 28-5.207, F.A.C.

This letter must be attached to the construction permit, No. AC05-193720, PSD-FL-173, and shall become a part of the permit.

Sincerely,

Howard L. Rhodes
Director
Division of Air Resources
Management

SUBJ: Permit Extension - Orlando Utilities Commission,
Indian River Plant
Permit No. AC05-193720, PSD-FL-173

Attached for your approval and signature is a permit extension prepared by the Bureau of Air Regulation. This facility consists of two 129 MW simple cycle gas turbines. During compliance testing, the turbines were found to have excessive vibration. It was discovered by the manufacturer that the turbine shafts and the couplings between the turbines and the generators had been improperly machined. To date, modifications have been made to one of the turbines. The permittee requested a 6 month extension in order to test this first turbine before modifications are made to the second turbine. Since the modifications are strictly mechanical in nature, the combustion process will not be affected. Thus, emissions will not be adversely impacted.

I recommend that this extension be approved.
