Name: Sharon Walker Title: Legal Advertising
In testimony whereof, I have hereunto set my hand and
aforesaid.

NOTARY:

Florida Department of Environmental Protection
Division of Air Resource Management, Bureau of Air Regulation
Project No. 03-10045-024-AC
Draft Air Permit Revision No. PSD-FL-010(H)
JIEA - St. Johns River Power Park
Duval County, Florida

Applicant: The applicant for this project is the JIEA. The applicant's authorized representative and mailing address is: Mr. Michael J. Brosi, Vice President - Electric System, JIEA, 21 West Church Street, Jacksonville, Florida 32202.

Facility Location: JIEA operates an electric utility in Jacksonville located at 1201 New Berlin Road in Duval County, Florida.

Project: The applicant proposes to install and operate natural gas (NG) igniters for startup, shutdown, flame stabilization and low load operation on the existing pulverized coal-fired Boilers Nos. 1 and 2. In addition, the applicant requests authorization to use the existing No. 2 fuel oil (FO) igniters for flame stabilization and shutdown on the same boilers (they are already permitted to use No. 2 FO igniters for startup and low load operation (Power Plant Siting Permit No. PAB 1-13)).

The original air construction permit, No. PSD-FL-010, required that the auxiliary boiler fire No. 2 FO while providing startup and shutdown capability for Boilers Nos. 1 and 2. The NG igniters will be used primarily in place of the No. 2 FO igniters for startup, shutdown, low load operations and flame stabilization.

The use of NG igniters should result in lower emissions of nitrogen oxides (NOx), carbon monoxide (CO), sulfur dioxide (SO₂) and particulate matter, particulate matter with an aerodynamic diameter equal to or less than 10 microns (PM₁₀PM₁₀).

than the current use of the No. 2 FO igniters. The emissions of volatile organic compounds (VOC) may increase (+1.85 tons per year) if the NG usage is at the same annual heat input rate when compared to No. 2 FO.

The overall net increase of emissions will be well below the Prevention of Significant Deterioration (PSD) significant emission rates. An air quality impact analysis was not required. Emissions from the facility will not significantly contribute

to or cause a violation of any state or federal ambient air quality standards.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.), and Chapters 62-4, 62-210 and 62-212 of the Florida Administrative Code (F.A.C.).

The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The Bureau of Air Regulation is the Permitting Authority responsible for making a permit determination for this project. The Permitting Authority's physical address is: 1111 South Magnolia Drive, Suite #4, Tallahassee, Florida. The Permitting Authority's mailing address is: 2600 Blair Stone Road, MS #5505, Tallahassee, Florida 32399-2400. The Permitting Authority's telephone number is 8501488-0114.

Project File: A complete project file is available for public inspection during the normal business hours of 8:00 a.m. to 5:00 p.m., Monday through Friday, (except legal holidays), at address indicated above for the Permitting Authority. The complete project file includes the Draft Permit Revision, the Technical Evaluation and Preliminary Determination, the application, and the information submitted by the applicant, exclusive of confidential records under Section 403.111, F.S. Interested persons may contact the Permitting Authority's project review engineer for additional information at the address, telephone number listed above. In addition, electronic copies of these documents are available on the following web site:

www.dep.state.fl.us/air/cpr/~fl.asv

Notice of Intent to Issue Air Permit: The Permitting Authority gives notice of its intent to issue an air permit to the applicant for the project described above. The applicant has provided reasonable assurance that operation of proposed equipment will not adversely impact air quality and that the project will comply with all appropriate provisions of Chapters 62-4, 62-204, 62-210, 62-212, 62-296 and 62-297, F.A.C. The Permitting Authority will issue a Final Permit Revision in accordance with the conditions of the proposed Draft Permit Revision unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, F.S., or unless public comment received in accordance with this notice results in a different decision or a significant change of terms or conditions.

Comments: The Permitting Authority will accept written comments concerning the proposed Draft Permit for a period of 14 days from the date of publication of the Public Notice. Written comments must be received by the Permitting Authority by close of business (5:00 p.m.) on or before the end of this 14-day period. If written comments received result in a significant change to the Draft Permit, the Permitting Authority shall revise the Draft Permit and require, if applicable, another Public Notice. All comments filed will be made available for public inspection.

PUBLIC NOTICE OF INTENT TO ISSUE AIR PERMIT REVISION

Petitions: A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed with (received by) the Department's Agency Clerk in the Office of General Counsel of the Department of Environmental Protection at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of publication of this Public Notice or receipt of a written notice, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Permitting Authority for notice of agency action may file a petition within 14 days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C. A petition that disputes the material facts on which the Permitting Authority's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address and telephone number of the petitioner; the name address and telephone number of the petitioner's representative; if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial rights will be affected by the agency determination; (c) A statement of when and how the petitioner received notice of the agency action or proposed decision; (d) A statement of all disputed issues of material fact. If there are none, the petition must so state; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action including an explanation of how the alleged facts relate to the specific rules or statutes; and, (g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Permitting Authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Permitting Authority's final action may be different from the position taken by it in this Public Notice of Intent to Issue Air Permit Revision. Persons whose substantial interests will be affected by any such final decision of the Permitting Authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. Mediation: Mediation is not available for this proceeding.
