RE: JEA
Northside Generating Station (NGS)
Project No. 0310045-034-AV

Dear Mr. Holtom:

On January 13, 2012, JEA submitted a request to obtain authorization to co-fire wood chips in the coal and petcoke-fired boilers at the above referenced facility. JEA requests that this request, as identified as Project No. 0310045-034-AV, be withdrawn and closed.

Pursuant to your conversation with Jay Worley, JEA Director of Environmental Programs, JEA will submit an air construction permit application in the next few weeks which will include a revised request to co-fire wood chips in the NGS boilers, as well as additional specified requests.

Please do not hesitate to contact Jay Worley at (904) 665-8729 if you have any questions or require any additional information.

Sincerely,

A handwritten signature in cursive script that reads 'James M. Chansler'.

James M. Chansler, P.E.
Chief Operations Officer
