RE: Informal Comments on Title IV Part of Proposed Title V Permit for Jacksonville Electric Authority Incorporating NOx Compliance Plan and Phase II NOx Requirements for St. Johns River Power Park, Units 1 and 2

Below are general comments regarding the Phase II "Part" of the Proposed Title V permit for Jacksonville Electric Authority.

1. We recommend that under Section IV, Subsection A.1., of the Acid Rain Part, the NOx Compliance Plans for St. Johns River Power Park be referenced along with the "permit application(s)" for this source in order to clearly identify that the NOx Compliance Plan are binding and enforceable parts of the permit.
2. We recommend that the permit indicate (under footnote #3 of Subsection A.2.) that the number of allowances allocated to phase II-affected units by U.S. EPA may change under 40 Part 73.
3. Under Subsection B.2., "Nitrogen oxide (NOx) Requirements", the affected units are identified in the text of the "NOx limit" as units "U1" and "U2". In order to avoid confusion, the unit identification in the text of the "NOx limit" should be identical to the "EPA ID" listed in the adjacent column.
4. The "Phase II NOx Compliance Plan" signed on December 19, 1997 and submitted by Jacksonville Electric Authority for St. Johns's River Power Park units 1 and 2 is not complete. However, it has come to our attention that Jacksonville Electric Authority submitted a second set of NOx Compliance Plan Forms (Florida's NOx Compliance Plan Forms). Please reference the correct/complete forms in the Acid Rain Part of the permit. Please reference these forms as an enforceable part of the permit.

For sent  
 12-6-98 Both units Phase II NOx Comp. Plan (and EPA form)  
 3-27-97 EPA letter -  
 12-19-97 sent Phase II NOx Comp.
