Plant City Phosphate Complex

November 2, 1999

Ms. Kay Strother  
Air Management Division  
Hillsborough County Environmental  
Protection Commission  
1410 North 21<sup>st</sup> Street  
Tampa, Florida 33605

Subject: CF Industries, Inc. (CFI)  
Plant City Phosphate Complex Consent Order  
Case No. 98-1116CCG0005

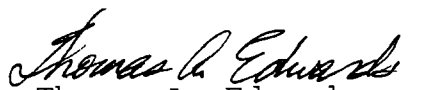

Dear Ms. Strother:

CF Industries, Inc., has completed the last of the corrective actions specified in the June 11, 1999, Consent Order No. 98-1116CCG005, addressing exceedances of the operating rate limits for the "B" Phosphoric Acid Plant. The computerized process information management system with alarms began operation on October 26, 1999 (re: July 23, 1999, report of corrective actions, and Condition 7 of the consent order).

Additionally, for your information, CFI has elected to pursue a 20% operating rate increase in lieu of the 10% increase reported earlier. A permit application for the larger rate increase is in preparation for probable submittal to DEP during November.

Please feel free to call if any discussion is needed.

Sincerely,

  
Thomas A. Edwards  
Superintendent,  
Environmental Affairs
