MEMORANDUM

DATE: February 18, 2000  
TO: Al Linero  
FROM: Noel Morera *N.M.* THRU: Richard C. Kirby IV, P.E.  
SUBJECT: CF Industries Application for a 20% Production Increase

The Environmental Protection Commission of Hillsborough County (EPC) has completed its review of the application received on January 19, 2000. The EPC has the following comments regarding this application:

1. CF Industries should look at the emissions changes up stream and down stream of the phosphoric acid plants and take these changes into account when determining how their emissions will be effected relating to PSD issues.
2. There is a new NESHAP for Phosphoric Acid Manufacturing and Phosphate Fertilizers Production (40 CFR Part 63, Subpart AA & BB, or 64FR31358) finalized on June 10, 1999. It appears that CF Industries may be subject to the new MACT.
3. Attachment 2 Table 5 of the permit application seems to predict that the higher the production rate of  $P_2O_5$ , the lower the scrubber outlet F lb./ton  $P_2O_5$  will be. However, the actual test data for the June 21, 1999 test shows that when the unit was tested at 86.3 and 96.8 TPH  $P_2O_5$  (input) the emissions increased from .004 to .006 lbs. F/ ton  $P_2O_5$  (input). The evaluation of scrubber performance submitted by CF Industries therefore seems to operate contrary what the test data for this source shows. (see the attached sheets)

**SUBJECT:** COMPLIANCE TEST - "B" PAP  
Permit No. 0570005-007-AV  
Emission Unit 009

Dear Mr. Kissel:

Enclosed are duplicate copies of the two recent compliance tests conducted at CF Industries, Inc., Plant City Phosphate Complex, on "B" Phosphoric Acid Plant. The tests were performed in accordance with "Specific Conditions 12 through 17" of Air Permit No. 0570005-007-AV, and at the rates specified in FDEP's letter dated May 26, 1999 (see Attachment 1).

In addition to the two compliance tests, CFII staff has enclosed copies of two preliminary test runs conducted on June 3, 1999, at 10% above the permitted rate, and June 4, 1999, at the permitted rate (see Attachment 2).

If there are any questions concerning the results, please give Michael Messina a call at 813-782-1591, ext. 290.

Sincerely,

T.A. Edwards,  
Superintendent, Environmental Affairs
