Re: Amendment of PSD-FL-339
DEP File No.: PSD-FL-339A
Plant City Phosphate Complex

Dear Mr. Edwards:

The Department reviewed your letter dated November 23, 2004 requesting permission to replace the existing Monsanto Model ES-210 mist eliminators elements in the Interpass Tower of the "D" sulfuric acid plant with Monsanto PSF-22120 elements. It is our understanding that this change will result in a reduction in the plant pressure drop of 1.8 inches of water, 0.8% of the total pressure drop. The new elements are expected to perform at least as well as the existing elements and will help in achieving the maximum permitted operating rate of 2,750 TPD of sulfuric acid for the "D" plant.

Because no emission increases are expected, the Department concurs with your decision and does not require any permit modifications. In fact, the new elements could decrease the sulfuric acid mist emission for the plant.

Sincerely,

James K. Pennington, P.E.

Administrator
North Permitting Section
