**Re: Tampa Electric Company (TEC)
H.L. Culbreath Bayside Power Station Unit 4
Notification of Actual Startup Date and Proposed Commercial Operation Date
Air Permit No. 0570040-026-AC**

Dear Ms. Danois and Ms. Vielhauer:

Tampa Electric Company (TEC) is submitting a notification to the Environmental Protection Agency (EPA) and Florida Department of Environmental Protection (FDEP) of the actual date of initial start-up as required by 40 CFR Part 60.7(a)(3), which states that a notification of the actual date of initial start-up of an affected facility shall be furnished within 15 days after such date. TEC hereby gives notice that the actual startup of Bayside Power Station (BPS) Unit 4 was May 27, 2009 as originally notified on April 27, 2009.

TEC is also submitting to the EPA and the FDEP the revised date of initial commercial operation of BPS Unit 4. Unit 4 is now scheduled to begin commercial operation on June 29, 2009. BPS Unit 4 is a PWPS FT8-3 SwiftPac aeroderivative simple cycle natural gas combustion turbine with a nominal output of 62 megawatt (MW) and a 60 foot stack.

TEC appreciates your cooperation in this matter and if you have any questions, please call me or Laurie Pence (813) 228-4457.

Sincerely,

Byron T. Burrows, P.E.

Re: Tampa Electric Company
H.L. Culbreath Bayside Power Station Unit 3 & 4
Notification of Certification and Performance Testing Dates
Air Permit No. 0570040-026-AC

Dear Ms. Vielhauer and Ms. Danois:

On May 8, 2009, TEC submitted the Monitoring Plan and Test Protocol for BPS Unit 3 and Unit 4. TEC is required by 40 CFR Part 60.8 and 40 CFR Part 75.61 respectively to perform and notify of performance and CEM certification testing. TEC is hereby submitting notification that the anticipated performance and CEM certification testing will be conducted during the week of July 13, 2009 for BPS Unit 4 and Unit 3. CEM shelter work for Unit 4 will begin during the week of May 25, 2009 and the week of June 1, 2009 for Unit 3. The CEM shelter work consists of the cycle response time, 7-day drift, linearity, calibrations and DAHS certification. The performance testing that will be held in June will consist of the RATA and stratification testing.

As the schedule changes TEC will keep the FDEP and EPCHC updated. TEC appreciates your cooperation in this matter and if you have any questions, please call me at (813) 228-4457.

Sincerely,

Dear Ms. Vielhauer:

Tampa Electric Company (TEC) is submitting a notification to the Environmental Protection Agency (EPA) and Florida Department of Environmental Protection (FDEP) of the actual date of initial start-up as required by 40 CFR Part 60.7(a)(3), which states that a notification of the actual date of initial start-up of an affected facility shall be furnished within 15 days after such date. TEC hereby gives notice that the actual startup of Bayside Power Station (BPS) Unit 6 was March 21, 2009 as previously notified on February 20, 2009.

TEC is also submitting to the EPA and the FDEP the date of initial commercial operation as required by 40 CFR 75.61(a)(2)(ii), "a notification of the actual date shall be submitted not later than 7 days following: the date the unit commences commercial operation or becomes affected, or the date when a new stack or flue gas desulfurization system exhausts emissions to the atmosphere." TEC hereby gives notice of commercial operation, for environmental purposes, of BPS Unit 6 on March 25, 2009. BPS Unit 6 is a PWPS FT8-3 SwiftPac aeroderivative simple cycle natural gas combustion turbine with a nominal output of 62 megawatt (MW) and a 60 foot stack.

Dear Ms. Vielhauer:

Tampa Electric Company (TEC) is notifying the Florida Department of Environmental Protection (FDEP) of the anticipated dates of initial startup as required by 40 CFR Part 52.129(c)(7)(i), which states that the anticipated date of initial startup of source must be made not more than 60 days or less than 30 days prior to initial startup. TEC hereby gives notification that the anticipated startup of Bayside Power Station (BPS) Unit 3 is June 3, 2009 and anticipated startup for BPS Unit 4 is May 27, 2009. BPS Units 3 and 4 are Pratt & Whitney FT8-3 SwiftPac aero derivative simple cycle natural gas combustion turbines with a nominal output of 62 megawatt (MW) and 60 foot stacks.

As the schedule changes TEC will keep the FDEP updated. If you have any questions, please call me or Laurie Pence (813) 228-4457.

Sincerely,

Byron T. Burrows, P.E.
Alternate Designated Representative
Environmental, Health & Safety
