Subject: TEC Bayside Preliminary DRAFT package

Mr. Velasco:

Here are some draft preliminary documents for the concurrent revision of the AC and AV for Bayside.

Please let me know if you have any comments or suggestions.

I will get back with you on Thursday afternoon. We are planning to send the official draft package by next Friday or Monday.

Call me anytime or send back the documents with your revisions.

[image002.jpg](#)
[Bayside consent decree requirements.docx](#)

Teresa:

Tampa Electric Company (TEC) has the following comments:

1. Paragraphs 26, and 27 and 28 of the consent decree are the specific requirements related to Gannon and repowering of the Bayside Facility. TEC believes these requirements have been satisfied as shown attached. Therefore, we request that the consent decree reference be deleted from the permit similar to the Bend Title V permit (-060AC and -061AV).
2. We would like to retain the emissions point sources in the Title permit as shown below. Even though none of these activities exist, we would like to preserve our right to utilize these activities in the future, if necessary. The current plan is to utilize a manual water suppression system (as necessary) to control fugitive emissions. TEC believes this approach provides reasonable assurance of meeting the 20% opacity requirement in the permit.

Emission Point Description	ID No.	Throughput TPH	Control Method	Efficiency
Fuel storage pile	FH-022/023 a & b	NA	Manual water suppression	50%
Dozer operations of storage piles	FH-044	NA	Manual water suppression	50%
Truck unloading - auxiliary	AH-001	400	Manual water suppression	85%
Storage pile	AH-002	400	Manual water suppression	90%
Truck dump to flux storage pile	OMH-001	NA	Manual water suppression	85%
Flux storage pile maintenance	OMH-002	NA	Manual water suppression	50%
Flux storage pile	OMH-003	NA	Manual water suppression	50%

Subject: Comments to the Title V

Hi Robert:

The majority of your new comments are accepted except for:

1. References to the EPA/TEC Consent Decree related to Gannon/Bayside will not be deleted until we research this document and determine that all the requirements are met; just as we did in Big Bend projects 060-AC and 061-AV. A separate request for this new permitting action is needed which can be submitted with your next renewal application.
2. We are not clear about the fuel yard activities and your request to delete the Dust Suppression System since it does not exist. The Table and the remaining emissions points clearly indicate the dust suppressant system as the control method. Please explain how the fuel yard is now and what is the actual method of control for these points.

Emission Point Description	ID No.	Throughput TPH	Control Method	Efficiency
Fuel storage pile	FH-022/023 a & b	NA	DS	50%
Dozer operations of storage piles	FH-044	NA	DS	50%
Truck unloading - auxiliary	AH-001	400	DS	85%
Storage pile	AH-002	400	DS/E	90%
Truck dump to flux storage pile	OMH-001	NA	DS	85%
Flux storage pile maintenance	OMH-002	NA	DS	50%
Flux storage pile	OMH-003	NA	DS	50%

We appreciate the time you took in reviewing the preliminary draft.

Teresa:

The only other suggested comment (for EU-008) is:

- (2) ~~Dust Suppression System. A manual water dust suppression system as necessary~~
(a) ~~Quarterly inspection of system for water leaks.~~
(b) ~~Quarterly inspection of spray nozzles.~~
~~The pumps, tanks, etc., that make-up the dust suppression system undergo normal maintenance including lubrication, flushing, and draining.~~

Please confirm.

Rob:

Except for the proposed new language (addition & deletion)to conditions B.3 and B.4; the majority of the other revisions are minor and they could have been taken care during the public notice period. However, because some of the documents were corrupted during the conversion to PDF, the draft package will be rescinded and replaced with a new revised Draft package.

Thank so much for your comments.

Teresa
