Subject: Application for Revision to Title V Air Operation Permit No. 0570127-001-AV
McKay Bay Refuse to Energy Facility

Dear Mr. Svec:

Enclosed, please find four copies of the first six pages of FDEP Form No. 62-210.900(1), entitled "Application for Air Permit - Long Form". CDM, on behalf of the City of Tampa, is submitting this application to revise the City's existing Title V permit to incorporate certain provisions of a USEPA Direct Final Rule for "Standards of Performance for Large Municipal Waste Combustors" published on November 16, 2001 (see 66 FR 57824). The Direct Final Rule amends 40 CFR 60.58b, Compliance and Performance Testing, by extending the startup, shutdown, and malfunction period to 15 hours for carbon monoxide following loss of boiler water level control and/or loss of combustion air control.

The applicant proposes that Specific Condition A. 32 of the existing permit be amended by inserting: "For the purpose of compliance with the carbon monoxide emission limits in 60.53b(a), if a loss of boiler water level control (e.g. boiler waterwall tube failure) or a loss of combustion air control (e.g. loss of combustion air fan, induced draft fan, combustion grate bar failure) is determined to be a malfunction, the duration of the malfunction period is limited to 15 hours per occurrence."

Very truly yours,
