Re: Amendment of Air Construction Permit PSD-FL-113 (AC 35-115379)
Lake County WTE Facility

Dear Mr. Bahour:

On March 20, 1995, the Department received your request for an amendment of the referenced permit to allow firing of non-hazardous solid waste contaminated with virgin or used oil products. The Department finds this request acceptable and hereby amends the permit as shown below:

NEW SPECIFIC CONDITION 1.e.1.:

1.e.1. The firing of non-hazardous solid waste contaminated with virgin or used oil products shall be allowed if the following conditions are met:

A. The maximum percentage of oil-contaminated solid waste defined as oil spill cleanup debris and absorbing media, including oil filters, fired in the MWC shall be twenty (20) percent by weight of the total solid waste input, based on a rolling 30-day average. All "used oil" shall comply with the definition stated in 40 CFR 260.10 and shall not exceed the specification levels for arsenic, cadmium, chromium, lead, and total halogens contained in Table 1 of 40 CFR 279.11, or contain any hazardous waste as defined in 40 CFR 261.3. The used oil shall have a polychlorinated biphenyl (PCB) content of less than 50 ppm (wt.).

B. Records shall be maintained showing the oil-contaminated waste generator's written certification that the waste is non-hazardous. Documentation requirements shall include a written description of the waste, a material characterization form (sample submitted with application), and the applicable material safety data sheets for the waste components. Tonnages of oil-contaminated solid waste fired shall be recorded and made available for inspection by the Department. These records shall be maintained for a period of two years.

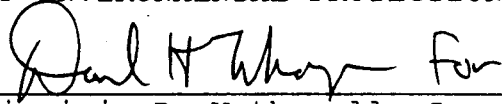

Mr. Brian Bahour

C. Quantities of used oil not commingled with solid waste may be burned provided that the oil has been generated entirely from internal operations of the OMS-Lake facility (i.e. no used oil in liquid form from outside generators). Records shall be maintained showing the tonnages of internally-generated used oil fired.

D. The permittee shall comply with all applicable requirements of federal, state and local regulations including 40 CFR 261 (Federal Hazardous Waste Regulations), 40 CFR 279 (Federal Used Oil Management), Chapter 62-701, F.A.C. (Solid Waste Management Facilities), Chapter 62-710, F.A.C. (Used Oil Management Regulations), Chapter 62-730, F.A.C. (Hazardous Waste Regulations).

A copy of this amendment letter shall be attached to and shall become a part of Air Construction Permit AC 35-115379 (PSD-FL-113).
