Tallahassee, FL 32399-2400

Re: **Permit No. 0850001-004-AV**  
**FPL Martin Plant Final Title V Permit**  
**Administrative Change for Consistency**

Dear Mr. Sheplak:

After reviewing the subject Title V permit, FPL has identified that evaporation of chemical cleaning waste was omitted from the final permit. This insignificant emission was included in the Title V permit application. We request the following change to the Martin plant Title V permit.

**Appendix I-1 List of Insignificant Emissions Units and Activities**

**Brief Description of Emissions Units & Activities:** The list of activities does not include the Evaporation of Boiler Chemical Cleaning Waste. Pursuant to the FDEP memorandum DARM-SS/CE-07, FPL requests this activity be listed in the final permit as:

- 7. Evaporation of Non-Hazardous Boiler Chemical Cleaning Waste*

Thank you for your prompt attention to this issue. If you have any questions please do not hesitate to contact me at (561) 691-7057.

Sincerely,

Mary J. Archer, QEP  
Principal Environmental Specialist  
Florida Power & Light Company
