Tallahassee, FL 32399-2400

BUREAU OF AIR REGULATION

Subject: Amendment Requests  
Stanton Energy Center

Dear Mr. Halpin:

Black & Veatch, on behalf of the Orlando Utilities Commission (OUC), requests per this application, the Department consider amending the Curtis H. Stanton Energy Center Site Certification (PA 81-14) to allow installation of a rail siding, railcar maintenance facility, fly ash blending operations, and use of pet coke/PRB in Units 1-2. These activities are described in further detail in the attached requests (Requests 8-11).

As the Department is aware, this is the fourth submittal for a number of projects that OUC is considering which are focused on improvements at or related to the Stanton facility. The first submittal (Requests 1-2) to the Bureau of Air Regulation on September 1, 2006, concerned the addition of a dibasic acid (DBA) additive system and a neural network-based combustion optimization system on Units 1 and 2. These requests were approved as modifications. The second submittal (Requests 3-4) on November 14, 2006, concerned reconductoring of the Curry Ford to Stanton transmission line and a culvert installation across the Stanton railroad corridor. These requests were approved as amendments. The third submittal (Requests 5-7) on December 14, 2006, concerned a scrubber upgrade, low NO<sub>x</sub> burners, and forced oxidation on Units 1-2. These requests are in processing awaiting submittal of a supporting air permit application, which is included herein as Request 12.

OUC appreciates the opportunity to work with the Department in obtaining the required approvals for improved operations at the Stanton Energy Center. Should you have any questions or concerns regarding this submittal, please do not hesitate to contact me at (913) 458-7563 or Denise Stalls of OUC at (407) 737-4236.

Sincerely,

Mike Soltys  
Site Certification Coordinator
