BUREAU OF AIR REGULATION

DATE: February 6, 2001

SUBJECT: Orlando Utilities Commission - Stanton Energy Center, Combined Cycle Unit A,
Supplemental Application, PA 81-14SA2, Module 8024

OUC in conjunction with Kissimmee Utilities Authority (KUA), Florida Municipal Power Agency (FMPA) and Southern Company submitted on January 22, 2001, a supplemental application for certification of a natural gas-fired, combined cycle facility at the Stanton Energy Center. We have determined that the application is "complete" according to Siting rules. Black & Veatch are starting to distribute the application. Please have your respective staffs review the application for sufficiency and submit their comments to me by March 9, 2001.

RE: Orlando Utilities Commission.
Curtis H. Stanton Energy Center
Facility ID No. 0950137-002-AC, PSD-FL-313

Dear Mr. Worley:

Enclosed for your review and comment is an application for Orlando Utilities Commission, in conjunction with Kissimmee Utility Authority, Florida Municipal Power Authority, and Southern-Florida to construct and operate a 633 MW electric generating unit at the existing Curtis H. Stanton Energy facility in Orange County, Florida

Your comments may be forwarded to my attention at the letterhead address or faxed to the Bureau of Air Regulation at 850/922-6979. If you have any questions, please contact Teresa Heron, review engineer, at 850/921-9529.

Sincerely,

Patty Adams

Teresa. This means complete in accordance with Siting. Does not mean complete for PSD. It is not yet "sufficient." Al.

Re: Orlando Utilities Commission
Supplemental Site Certification Application
Stanton Energy Center Combined Cycle Unit A

Dear Mr. Oven:

OUC, on behalf of itself, the Kissimmee Utility Authority, and the Florida Municipal Power Agency, is pleased to submit this Supplemental Site Certification Application for Stanton Energy Center Combined Cycle Unit A (Stanton A) at the Stanton site. Stanton A is proposed as a 633 MW (nominal) combined cycle combustion turbine unit firing natural gas as the primary fuel. In addition to the new unit, a new 230 kV transmission line will be constructed entirely on the Stanton site to connect the new unit to the existing Stanton switchyard, and a new 4.5 mile natural gas pipeline will be installed from the new unit to the FGT lateral south of the Stanton site. The natural gas pipeline will be located entirely within the existing OUC-owned utility corridor extending south from the Stanton site. Certification is sought for the new unit, transmission line, and natural gas line under the supplemental procedures of the Florida Electrical Power Plant Siting Act, Chapter 62-17.231, Florida Administrative Code.

Five copies of the application and a \$127,250 check for the filing fee are enclosed for the Department's initial completeness review. Additional copies will be submitted to you and distributed to the other agencies after the application is determined to be complete.

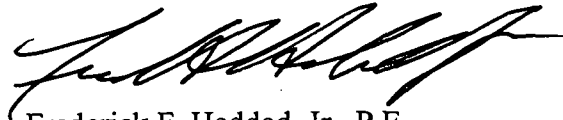

In addition, by copy of this letter, we are also submitting one signed and sealed original and three copies of the Prevention of Significant Deterioration (PSD) permit application to the Department's Bureau of Air Regulation. This PSD application comprises Volume 3 of the Supplemental Site Certification Application. The appropriate application fee for that permit application is to be covered by the supplemental site certification application fee.

A petition to determine the need for the combined cycle unit will be filed with the Public Service Commission during the week of January 22, 2001.
