Subject: Kane Island Clock

I talked to Trina and here is the situation. The public comment period started on May 17th when the public notice was published. This **Clock** applies to Katy at the EPA and the public at large. As for the department, the clock is on hold until the extension request from FMPA gets withdrawn or resolved. I think they requested an extension until June 21st but I will double check with Teresa. We received FMPA's comments on the draft permit on June 4th and Trina thinks they will not withdrawal their extension request until they get a chance to talk to us about their comments. Al will be back next Tuesday and hopefully we can setup a meeting on this subject shortly there after.

Let me know if you have any questions.

Thanks
