RE: Florida Power & Light Company Riviera Beach Energy Center
Commencement of Construction Notification
DEP File No. 0990042-006-AC

Dear Mr. Halpin:

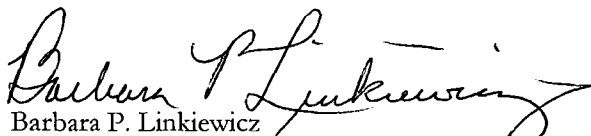

In compliance with the notification requirements under 40 CFR Part 60.7(a)(1) on behalf of Florida Power & Light Company (FPL) and its Designated Representative, Christian Kiernan, Zachry Industrial Inc., contractor for construction of the new combined cycle Unit 5 at the FPL Riviera Beach Energy Center (RBEC) is providing notice that construction has commenced on the FPL RBEC Plant Conversion Project. This project will be constructed per the Florida Department of Environmental Protection (FDEP) Conditions of Certification (Final Order #09-54A) and the FDEP Air Construction Permit No. 0990042-006-AC.

The RBEC Plant Conversion Project is located at 200-300 Broadway, Riviera Beach in Palm Beach County, Florida. FPL is constructing a nominal 1,250 megawatt (MW) natural gas-fueled combined cycle unit and ancillary equipment at the site previously known as the Riviera Plant. The former two 300 MW residual oil and gas-fueled steam generating units were shut down and dismantled in 2011 as part of this project.

If you have any questions, or require any additional information, please contact Jessica Peck at (561) 691-2859.

Sincerely,

Florida Power & Light Company

Barbara P. Linkiewicz
Director of Environmental Licensing
