Re: North County Resource Recovery Facility, Permit 0990234-015AC/PSD-FL-108H

Dear Ms. Kemker:

The Solid Waste Authority of Palm Beach County, FL ("SWA") operates a Municipal Solid Waste Combustor ("MWC") that is subject to NSPS Subpart Cb, at the North County Resource Recovery Facility ("NCRRF") on Jog Road, in West Palm Beach. The Florida Department of Environmental Protection ("FDEP") issued an Air Construction permit (permit number 0990234-015AC/PSD-FL-108H) authorizing the refurbishment of the MWC Units 1 and 2 in September 2009.

As required by NSPS 60.7(a)(1) this letter serves as notification within the specified 30 day period, that the construction of MWC Unit 1 commenced on April 1, 2010. This project includes the refurbishment of the MWC boilers and the installation of air pollution control equipment.

If you have any questions or comments please contact Mary Beth Morrison at (561)640-4000 ext. 4613.

Very truly yours,

Mark Hammond
Executive Director
