BUREAU OF
AIR REGULATION

February 7, 2011

Mr. Roy S. Belden
Vice President
Shady Hills Power Company, LLC
120 Long Ridge Road
Stamford, Connecticut 06927

Subject: Request for Additional Information – Shady Hills Generating Station (PSD-FL-402A)

Dear Mr. Belden:

It is our understanding that on July 14, 2010, you submitted to the Florida Department of Environmental Protection (FDEP) an Air Construction Permit application and revised best available control technology analysis for the Shady Hills Generating Station to be located in Pasco County in Spring Hill, Florida. The permit application does not contain emission estimations for greenhouse gases (GHGs). As you may be aware, for construction projects in Florida which trigger prevention of significant deterioration (PSD) permitting for GHG emissions, the U.S. Environmental Protection Agency (EPA) Region 4 will be the permitting authority. Please submit an estimation of GHG emissions to us at the following address as soon as possible in order for us to determine if GHG emissions from your proposed construction project are subject to federal PSD permitting requirements (40 CFR 52.21).

U.S. EPA Region 4
Air Permits Section
61 Forsyth St., SW
Atlanta, Georgia 30303

If you have any questions or need additional information regarding these comments, please contact Katy R. Forney of my staff at 404-562-9130.

Sincerely,

Gregg M. Worley
Chief
Air Permits Section
