Re: Notice of Completeness for Proposed Florida Shady Hills Generating Station PSD Application

Dear Mr. Belden:

The U.S. Environmental Protection Agency has reviewed your greenhouse gas Prevention of Significant Deterioration permit application for the proposed Florida Shady Hills Generating Station expansion project that was received by the EPA on September 25, 2012, and determined that as of April 11, 2013, your application, including supplemental information received, is complete. Even though your application is deemed complete, in the course of this review we may identify further information that will be essential to enable the EPA to continue processing your application, including information that may be needed to respond to public comments.

If you have any questions please contact Ana M. Oquendo at (404) 562-9781 or quendo.ana@epa.gov.

Sincerely,

Kelly Fortin
Acting Chief
Air Permits Section
