RE: AC53-222859 (PSD-FL-199), AFI Air Classifier

Dear Mr. Lewis:

IMC Fertilizer, Inc. - New Wales Operations is hereby requesting that the expiration date for this permit be extended for an additional two years. This request is based on a current restriction on capital monies for new construction projects. This situation has occurred because of a market downturn in the price of phosphate-based products. Based on the expectation that the market will recover, IMCF-NWO expects to undertake this project prior to the expiration of the requested extension period of time.

Thank you for your attention in this matter. If there is additional information required, please contact me or Dave Turley.

Sincerely,

J. M. Baretincic
Director
Environmental Services
