TO: Clair Fancy  
THROUGH: Dan Williams *DW*  
FROM: Bill Thomas *WCT*  
DATE: March 19, 1984  
SUBJECT: IMCC New Wales Request To Extend Construction  
Permits AC53-19051, 22671 & 23546

Attached is IMCC's request to extend the above subject permits. The first two permits were issued in the Tampa Office, the third permit was issued in Tallahassee. As we discussed, the three permits should be acted on as a group and BAQM will process the request and respond to IMCC.

The permits were issued on 8/79, 1/80 and 5/80. IMCC's request would extend all three permits beyond five years. The Department appears to be reluctant to extend permits beyond five years, but I do not know of a prohibitive rule.

I recommend that the requested permit extensions be granted.

WCT/scm

January 20, 1984

Mr. Dan A. Williams, P.E.  
State of Florida  
Department of Environmental Regulation  
S. W. District  
7601 Highway 301 N.  
Tampa, Florida 33610-9544

Dear Mr. Williams:

IMC, New Wales Operations, is hereby requesting an extension until December 31, 1985 on the following Construction Permits which presently expire on July 1, 1984:

8/79	AC53-19051	#3 Phosphoric Acid Plant	TPA
1/80	AC53-22671	GTSP Truck/Rail Loadout	TPA
5/80	AC53-23546	#2 Diammonium Phosphate Plant	Tal.

As previously discussed with your staff, IMC, New Wales Operations, had completed construction of the above units in late 1981. Except for mechanical checkout in November and December of 1981, these facilities have not yet been put into operation due to the economic conditions that have prevailed since then. Our present estimate is that these facilities would probably become operational in 1985.

We, therefore, request that the expiration date of the permits be modified based upon the facts presented above.

Sincerely,

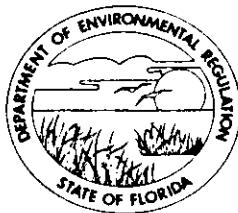

J. M. Baretincic  
Manager Environmental Services  
& Quality Control

Dear Mr. Baretincic:

Modification of Conditions

Permit No. AC 53-23546 No. 2 DAP Plant

We are in receipt of your request for a modification of the permit conditions. The conditions are changed as follows:

<u>Revised Condition</u>	<u>From</u>	<u>To</u>
Expiration Date	July 1, 1984	December 31, 1985

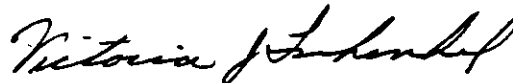

New Specific Conditions

- A. Submit semi-annual reports, beginning on July 1, 1984, giving the status of the source (operational or not), any activity involving the source that occurred during the proceeding six months (scavenged components or operation of any of the source's equipment), and plans for the source during the next six months (operation or maintenance).
- B. Notify the department's Southwest District Office 30 days in advance of starting production or operations of the source.
- C. Conduct the compliance tests required by the construction permit within 45 days of placing the source in operation. Notify the District Office 10 days prior to the scheduled tests.
- D. Within 60 days after the source is placed in operation, submit copies of the compliance test reports and a complete application for a permit to operate the source to the Southwest District Office.

Mr. J. M. Baretincic  
Page Two
