Subject: New Wales BART Exemption Application

Thank you for your question about the HRS installations for Sulfuric Plants 1 and 2. The HRS installations need to be addressed in both Scenarios A and B as they were discussed in Scenario B. The Plant 1 HRS installation will be moved from the June 2009 turnaround to January 2012. We are preparing a letter to request this change to the New Wales BART Exemption Report and will submit as quickly as possible.

Again, thanks for your attention in this matter.
