| Cleve Holaday | DEP | 850-921-8986 |

11/19/03

Dear Myra,

Thanks for the message and agenda. As we spoke about the other day, we will be needing some justification for the short term production level requested for the new BSW, meaning we need you to provide some actual production data for the existing BSW that will justify the 2300 TPD request as a replacement emissions unit: like-and-kind type, with no increase in production. If the request does turn out to be an increase in production, then there would be no entitlement for a PCP exemption. Look forward to your visit. Call me if there are any changes. Take care.

Bruce

Subject: Agenda

<<AgendaNov212003.doc>>

After talking with the GP folks we decided that we had a few miscellaneous permitting issues that we would like to discuss with the Department on Friday even though our original reason has become moot. Attached is the proposed agenda. Please feel free to modify the agenda for items the Department would like to cover as well.

Sincerely,

Myra Carpenter

Environmental Superintendent

Georgia-Pacific Corp., Palatka Operations

(386) 329-0918

11/13/03

Lee,

Thanks for the update on the extension issue. I'll make a note on the Q & A document. Take care.

Bruce

Subject: Q & A's for P & P 2

Bruce: Not too long ago I faxed you some Q & A's I have that have to do with the bubble concept in the Pulp & Paper MACT II.

In one of the answers to a question it states that only EPA can approve compliance extensions - This is not correct - I had forgotten that this was in the Q & A's. The permitting authorities have the authority to approve compliance extensions for all MACTs.
