Re: AIRS ID No. 1070005
Georgia-Pacific Corporation, Palatka Mill
MACT I Compliance Pollution Control Project

Dear Mr. Kennedy:

The Department received the modeling information for the above referenced application on December 11, 2001. Based on our initial review of the proposed project and conversations with Dave Buff, P.E., of Golder Associates, Inc., we are requesting the following additional information in order to continue processing this application package. Please submit the information requested below to the Department's Bureau of Air Regulation:

No short-term (3-hour and 24-hour averaging times) SO₂ modeling results were provided. Please provide these modeling results for both compliance scenarios for comparison to the SO₂ ambient air quality standards (AAQS) and PSD Class I and II increments. Modeling results for comparison to the AAQS should also include the respective second-highest 24 or 3-hour short-term background monitoring concentrations. In addition, please summarize supporting information and results in tables.

The Department will resume processing this application after receipt of the requested information. Rule 62-4.050(3), F.A.C. requires that all applications for a Department permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. A new certification statement by the authorized representative or responsible official must accompany any material changes to the application. Rule 62-4.055(1), F.A.C., now requires applicants to respond to requests for information within 90 days.

Please note that in accordance with Rule 62-4.055(1), F.A.C., "The applicant shall have **ninety days** after the Department mails a timely request for additional information to submit that information to the Department. Failure of an applicant to provide the timely requested information by the applicable date **shall** result in denial of the application."
