**RE: FPL Sanford Power Plant - TITLE V AIR OPERATING Permit 1270009-011-AV
Combustion Turbine 5C
Excess Emissions Request for Rotor Change-out**

Dear Ms. Vielhauer:

Florida Power & Light is requesting an extended excess emissions period for the Sanford Plant Unit 5C combustion turbine following the rotor change-out currently underway. The turbine manufacturer has identified that a Full Speed No Load [FSNL] operation is necessary following the rotor change-out. The extended start-up period is scheduled to occur during the period of July 10 through August 10, 2006. The Department granted a similar request following the replacement of rotor blade change-out in March 2003 [authorization letter attached].

If you have any questions, or require any additional information, please contact me at (561)691-7057 or Randy Hopkins at (386) 575-5385.

Thank you for your consideration in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mary Archer', written over a horizontal line.
