Mr. C. H. Fancy, P.E., Chief
Bureau of Air Regulation
Air Resources Management Division
Florida Department of Environmental Regulation
Twin Towers Office Building
2600 Blair Stone Road
Tallahassee, Florida 32399-2400

Dear Mr. Fancy:

This is in response to your June 21, 1990, letter to Ms. Jewell A. Harper, regarding the proposed test burn of Orimulsion at Florida Power & Light's Sanford Unit #4. We have reviewed our records and concur that the relaxed limits for particulate matter and opacity approved on February 29, 1980, (45 FR 13455) are still in effect. Therefore, a SIP revision to relax the emission limit for particulate matter for the proposed test burn will not be necessary. A revision for the opacity limit will be necessary only if the relaxed limit approved in 1980 is not sufficient for these test purposes.

In order to relax the emission limit for sulfur dioxide, a revision to the SIP will be necessary. We concur that the Florida Testing and Research Rule may be used providing the revision is submitted to EPA for approval.

If you have any questions or comments, please do not hesitate to call Kay Prince of my staff at (404) 347-2864.

Sincerely,

Bruce P. Miller, Chief
Air Programs Branch
Air, Pesticides & Toxics
Management Division
