Re: Sanford Unit #4 PSD Permit Application

Dear Mr. Fancy:

My staff has reviewed the May 22, 1990 submittal by Hopping Boyd Green and Sams on behalf of Florida Power and Light (FPL) to operate, construct, and modify a fossil fuel steam generator at the FPL Sanford facility. The only comment we have at this time is that the air quality analysis procedure does not include a discussion of "Good Engineering Practice Stack Height" (GEP). A discussion of GEP should be added to the analysis.

If you have any questions, please call Lewis Nagler of my staff at (404) 347-2864.

Sincerely yours,

Brian Beals, Chief
Source Evaluation Unit
Air Enforcement Branch
Air, Pesticides and Toxics
Management Division
