Mr. R. Douglas Neeley, Chief  
Air and Radiation Technology Branch  
Air, Pesticides and Toxics Management Division  
United States Environmental Protection Agency, Region 4  
61 Forsyth Street  
Atlanta, GA 30303

Re: PROPOSED Title V Permit No.: 1270028-001-AV  
DeBary Facility

Dear Mr. Neeley:

The subject permit for the DeBary Facility was posted on to the Division of Air Resources Management's world wide web site for the United States Environmental Protection Agency (USEPA) Region 4 office's review on October 20, 1998.

It has been brought to our attention that the applicant has not withdrawn their petition request. The applicant had filed a petition for an administrative hearing on the DRAFT Title V permit. Because we are under a Florida Administrative Procedures Act action, the PROPOSED Title V permit is hereby withdrawn. A PROPOSED permit will be routed to USEPA after the applicant withdraws their petition request.

If you should have any questions, please contact Mr. Lennon Anderson at 850/921-9588.

Sincerely,

*C. H. Fancy*

"Protect, Conserve and Manage Florida's Environment and Natural Resources"

Memorandum

Environmental Protection

TO: Rick Kirby, IV, P.E.  
FROM: Scott M. Sheplak, P.E. SMS  
SUBJECT: Col Met 0570287 and Storopak 0571205  
DATE: December 10, 1998

We appreciate you listening to our concerns on the subject permits. In order for a source to escape Title V, limit(s)/restriction(s) must be federally enforceable. To be considered federally enforceable two criteria must be met: 1) the permitting mechanism must be a federally approved permit (the AC/FESOP permit process is); and, 2) the limit(s)/restriction(s) must be practically enforceable. A generic statement that HAPs must be less than 10 and 25 TPY is "hollow." For synthetic minor sources, limit(s)/restriction(s) should be established that can be verified. The whole purpose is to show/verify that a source continues to remain a synthetic minor.

Two concerns we discussed are statewide consistency and proper enforceability. Sources with greater than 10 TPY of VOC may need HAP restrictions because the majority of HAPs are VOCs. Only those sources that are naturally minor do not need to worry about HAP limit(s)/restriction(s). As we discussed, we may be changing a direction in the permitting of synthetic minor HAP sources. I recommend a phased in approach due to current workloads. I will discuss this matter further with Clair Fancy. We plan to set up a teleconference to discuss this further in January 1999.

If you would like for us to review the pre-drafts for the subject two sources, please route them to Ed Svec. Thank you for your patience.

Mr. Daniel A. Kleman  
County Administrator  
Hillsborough County  
601 East Kennedy Boulevard  
Tampa, Florida 33602

Re: Initial Title V Permit Application  
Hillsborough County Resource Recovery Facility

Dear Mr. Kleman:

Thank you for the timely submittal of your initial Title V Air Operation Permit application for the Hillsborough County Resource Recovery Facility. The Department will begin reviewing this application in the near future. Before we begin the review, we would like to extend the opportunity for you to examine the **List of Applicable Regulations** provided in your application. **This is not a letter of incompleteness.**

The promulgation of the New Source Performance Standards (NSPS) 40 CFR 60, Subparts Cb, Cc, Ea, and Eb has occurred after the submittal of your initial Title V Air Operation Permit application. If any of these subparts has applicability to your facility and they were not included in the **List of Applicable Regulations**, please provide this office with a revised permit application listing all applicable regulations, an updated statement of compliance, and the appropriate certifications, so that the permit shield can be extended to include the appropriate NSPS subpart.

Please submit your Title V permit application revision, if required, to my attention at the above letterhead address. If you have any other questions, please contact Edward J. Svec at 850/921-8985.

Sincerely,

A handwritten signature in cursive script that reads "Scott M. Sheplak".
