

Appendix I-1: List of Insignificant Emissions Units and/or Activities.

Sea Ray Boats, Inc.
Palm Coast Division

Draft Permit No.: 0350003-008-AV
Facility ID: 0350003

The facilities, emissions units, or pollutant-emitting activities listed in Rule 62-210.300(3)(a), F.A.C., Categorical Exemptions, or that meet the criteria specified in Rule 62-210.300(3)(b)1., F.A.C., Generic Emissions Unit Exemption, are exempt from the permitting requirements of Chapters 62-210, 62-212 and 62-4, F.A.C.; provided, however, that exempt emissions units shall be subject to any applicable emission limiting standards and the emissions from exempt emissions units or activities shall be considered in determining the potential emissions of the facility containing such emissions units. Emissions units and pollutant-emitting activities exempt from permitting under Rules 62-210.300(3)(a) and (b)1., F.A.C., shall not be exempt from the permitting requirements of Chapter 62-213, F.A.C., if they are contained within a Title V source; however, such emissions units and activities shall be considered insignificant for Title V purposes provided they also meet the criteria of Rule 62-213.430(6)(b), F.A.C. No emissions unit shall be entitled to an exemption from permitting under Rules 62-210.300(3)(a) and (b)1., F.A.C., if its emissions, in combination with the emissions of other units and activities at the facility, would cause the facility to emit or have the potential to emit any pollutant in such amount as to make the facility a Title V source.

The below listed emissions units and/or activities are considered insignificant pursuant to Rule 62-213.430(6), F.A.C.

1. Foam Operation (Side foam in hull of boat – injection method) due to negligible VOC emissions from closed system, i.e. less than 5 TPY of VOC. (Rule 62-213.430(6)(b)d., F.A.C.).
2. (2) Baghouses located in the north and west side of the fabrication building. Due to negligible particulate matter emissions, i.e. less than 5 TPY of PM and VOC. VE is less than 5% Opacity. (Rule 62-213.430(6)(b)d., F.A.C.).
3. Plant maintenance activities which include, but are not limited to painting of the buildings, inside and/or outside, cleaning of restrooms, cleaning of offices, re-striping of parking lots and drives, vehicle maintenance (i.e. forklifts), etc. These activities are performed periodically and potential emissions are negligible, less than 5 TPY VOC. (Rule 62-213.430(6)(b)d., F.A.C.).
4. (2) Resin storage tanks, (1) propane tank, (1) gasoline tank and (1) diesel tank. Due to negligible VOC emissions, less than 5 TPY VOC and less than 1,000 PPY of any single HAP (Rules 62-213.430(6)(b)b. and d., F.A.C.).
5. (1) Vacuum System, utilized to collect sawdust from assembly operations, system vented inside building.
6. This activity produces no VOC emissions and negligible PM emissions, less than 5 TPY each. VE is less than 5% Opacity. (Rule 62-213.430(6)(b)d., F.A.C.).
