O&M Plan

The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&M) plan. The O&M plan shall include, but is not limited to:

- (1) Operating parameters of the pollution control device;
- (2) Time table for the routine maintenance of the pollution control device as specified by the manufacturer;
- (3) Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation;
- (4) A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant;
- (5) A record log which will indicate, at a minimum:
 - a. When maintenance and observations were performed;
 - b. What maintenance and observations were performed; and
 - c. Who performed said maintenance and observations.
 - d. Acceptable parameter ranges for each operational check.

[Pinellas County Code, Subsection 58-128]

Reviewed records for the months of December 2008 – January 21, 2009

Comments:

I had a conversation with Bill Froberg prior to my visit and was informed the maintenance logs were missing a few items and do not comply with the O&M Plan. He asked me to bring it to their attention and provide them with a copy of the letter sent to them in

February, 2009. The O&M Plan review was not completed by us, therefore, we are giving them 10 business days to make the additions to their logs without further action.

Aside from the changes to the record logs, the facility appears to be in compliance.

Exit Interview:

I informed Mr. Riddlebarger that the maintenance logs they are using are missing a few items (per a conversation with Bill Froberg) And asked him to add those items within the next 10 business days. He stated he would call Jason Jones and let him know. I left him with a copy of the letter sent to the company in February indicating the changes that needed to be made to the logs. I further told him that it appeared the facility is in compliance pending further review of the file and corrections to the maintenance logs.
