Dan -

Attached are pictures taken by Debbie Telemeco-Anders, ESII, during a 03/15/2006 inspection of the Central Avenue CEMEX facility having AIRS ID #1150019.

The Concrete Batching Plant Air General Permit Terms and Conditions [DEP Form No. 62-210.920(7) Part II. (4)(b), Florida Administrative Code (F.A.C.)] that require:

"The owner or operator ... take reasonable precautions to control unconfined emissions from hoppers, ... equipment, ... truck loading and unloading, roads, parking areas, stockpiles, and yards as required by Rule 62-296.320(4)(c), F.A.C. The following shall constitute reasonable precautions:

1. Management of roads, parking areas, stock piles, and yards, which shall include one or more of the following:
    - a. Paving and maintenance of roads, parking areas, and yards.
    - b. Application of water or environmentally safe dust-suppressant chemicals when necessary to control emissions.
    - c. Removal of particulate matter from roads and other paved areas under the control of the owner or operator to mitigate reentrainment, and from building or work areas to reduce airborne particulate matter.
    - d. Reduction of stock pile height or installation of wind breaks to mitigate wind entrainment of particulate matter from stock piles
  2. Use of spray bar, chute, or partial enclosure to mitigate emissions at the drop point to the truck.
- (Rule 62-296.414(2), F.A.C.) "

As with the Anderson Asphalt facilities having AIRS ID #1150137 and #1150053, immediate corrective action (e.g., paving and maintenance of roads, parking areas, & yards) is required to avoid enforcement to bring your facility into compliance.

Please advise of the dates on which CEMEX intends for this matter to be addressed and resolved.

Thank you,
