COMMENTS: This inspection was attended by Joe Panetta and Max Grondahl, as part of this inspection we were to check and see if the CALCIUM CARBONATE FINE SCREENING SYSTEM and the LIMEROCK DRYER were not operating and to verify they were inoperable. E.R. Jahna has applied and received a GP in place of the previous AO based on the information that E.R. Jahana supplied the equipment listed above is inoperable and require thousands of dollars to repair and they do not want to incur that expense. Records were checked. Facility seemed to be in compliance at time of inspection. 1 Records show last operation of the above mentioned equipment was August 2005. Does not appear to be used recently.
