4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the test was completed?----- ☒ Yes ☐ No

The VE test I observed occurred on March 4, 2009 and at the time of this report the test report has not yet been filed with the Department (less than 45 days has passed since the test occurred). Previous test reports have been submitted within the required 45 day time frame.

PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C.

COMMENTS: Mr. Kevin Harrington, Operations Manager, who provided me with requested records and who escorted me on my inspection of the facility met me upon my arrival. Mr. Kyan Peterson, a certified Visible Emissions tester, employed by Arlington Environmental Services Inc. was also on site to perform the annual VE testing for the facility. I, as part of my inspection, observed the VE testing, although not a certified VE tester I did not observe any visible emissions greater than 0% occurring during the VE test.

The facility was in operation at the time of this inspection, loading of the silo and batching operations were occurring.

Reasonable precautions for fugitive emissions are judged to be adequate. The facility waters the rock; the yard is surfaced and was relatively clean. A vacuum shroud assembly is used to capture particulate emissions from the batching operation.

The facility maintains logs of weekly plant inspection, plant service & repairs, weekly inspections of fuel tanks and dikes, monthly retention pond inspections and dust maintenance operations.
