COMMENTS: In a compliance inspection conducted on 10/29/2008, AQD staff observed operations at Jolt Technology. The facility utilizes a halogenated solvent degreaser. Mr. Rodney Jamison (Senior Process Engineer) accompanied staff on the inspection. The facility housekeeping is excellent and Mr. Jamison stated that the facility has been designated as conditionally exempt.
The degreaser was working properly during the inspection and Mr. Jamison keeps records of all maintenance. He did state that on 03/21/2008 a repair was conducted on the chiller (freon).
