COMMENTS: In a compliance inspection conducted on 03/24/2009, AQD staff observed operations at Derekor of Florida. The facility is a marina with two large hangars, boat pull out, spray booth, boat dockage and storage, dust collector and offices. Mr. Galloway Sethby accompanied staff on the inspection. Mr. Sethby stated that painting and repairs (some resin work) is down. The facility did recently get two new fuel tanks (Diesel 1000 gallons and Gasoline 500 gallons). The facility haz-mat storage area had excellent housekeeping.

The facility use to conduct some on-water painting, however that is not being conducted now. One dust collector was observed in place and is utilized for the wood shop.

Mr. Sethby will be sending the VOC usage logs to the department.
