4. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector? (If answer to this question is “Yes”, then continue on to questions 4.a) and 4.b) below. If answer is “No” then skip 4.a) and 4.b) and continue on to question 5.)----- Yes No
 - a) Was the batching operation in operation during the visible emissions test?----- Yes No
 - b) During the visible emissions test, was the batching rate representative of the normal batching rate and duration?----- Yes No
5. If emissions from the weigh hopper (batcher) operation are controlled by a dust collector, which is separate from the silo dust collector, are the visible emissions tests of the weigh hopper (batcher) dust collector conducted while batching at a rate that is representative of the normal batching rate and duration?----- Yes No

(check appropriate box(es))

1. Is this facility: 1) a stationary ; 2) a relocatable ; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (*Please check only one box.*)
2. If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (*If your answer to this question is YES, then proceed to questions 2.a), thru 2.d), below.*)----- Yes No
- a) Are there any additional nonexempt units located at this facility?----- Yes No
- b) Is the total combined annual facility-wide fuel oil usage of all plants less than 240,000 gallons per calendar year?----- Yes No

COMMENTS:

This was a visible emissions test observation and annual inspection, the visible emissions test was conducted by Bill Harlington. The plant has 4 silos & 3 baghouses (2 silos served by 1 baghouse) the plant also has 2 central dust collectors (1 newly installed, will be added to permit within 30 days). There was no visible emissions from all 5 units. Mr Allan Avila (Area manager) was present during the inspection, he explained that the company purchased a sweeper truck recently to assist with the control of fugitive dust around the plant. According to him the plant process 12,000 tons of material monthly and uses an average of 4,500 gallons of diesel fuel.

The State permit expires 4/23/08.
